EDUCATION:

UW Full Stack Web Development Coding Bootcamp, Seattle, WA

Intensive program to learn full stack web development.

March 2023

Smith College, Northampton, MA

BA in Government, Jewish Studies

May 2018

TECHNICAL SKILLS:

Front End: HTML, CSS, JQuery, Javascript, Bootstrap

Back End: MySQL, SQL Server, MongoDB, Express, ReactJS, Node, Handlebars, Webpack

PROJECTS:

Burnout Buddy | <https://github.com/giferrari/burnout-buddy> | <https://burnout-buddy.herokuapp.com/>

- Full stack web application that utilizes an MVC paradigm to generate random wellness activities, allows users to record and store their feelings, and provides login/signup capabilities
- I worked primarily on front end development, but I also wrote the login/signup routes, and the route to store user feelings, and helped with miscellaneous debugging tasks
- Technologies used: HTML, CSS, Javascript, Express, MYSQL, Sequelize, Handlebars, bcrypt, Node

Weather Dashboard | <https://github.com/clairebain3/weather-dashboard> | <https://clairebain3.github.io/weather-dashboard/>

- Interactive web application that takes user input to select a city, then displays information about the weather forecast for that city. The weather data is generated using a third party API
- Technologies used: HTML, CSS, Javascript, OpenWeather API

EXPERIENCE:

Seyfarth Shaw, LLP, Seattle, WA

Data Services Generalist

July 2019 — present

Provided mass data updates and reporting using Data Loader, SQL, Valorex Fusion, and Excel

Provided technical support and advice to users in Tracker and Salesforce

Used Valorex Fusion to enhance and automate reporting

Pabian Law, LLC, Framingham, MA

June 2018 – July 2019
